### **DETAILED ACTION**

### Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitation "the inverse of the product of a normal efficiency and a reverse efficiency of said speed reducing mechanism is equal to or greater than 1.17 and equal to or smaller than 3.75" in claims 1, and 4-5 renders the claim indefinite for being unclear and confused as to meaning in order to determine the scope of the claimed invention.

- 3. Claim 2 recites the limitation "the inverse of the product of the normal efficiency" in lines 33-34. There is insufficient antecedent basis for this limitation in the claim.
- 4. Claim 3 recites the limitation "the inverse of the product of the normal efficiency" in lines 33-34. There is insufficient antecedent basis for this limitation in the claim.

## Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3616

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Buma et al (U.S. 7,129,659)

Buma et al discloses a stabilizer control apparatus comprising: a stabilizer including a pair of stabilizer bars (11, 12) disposed between a right wheel (Wfr) and a left wheel (Wfl) of a vehicle, and an actuator having an electric motor (15) and a speed reducing mechanism (16) disposed between said pair of stabilizer bars (11, 12); and control means (25) for controlling said electric motor (15) in response to a turning state of said vehicle, to control a torsional rigidity of said stabilizer; wherein said control means (25) controls an output of said electric motor (15) to be held or reduced, when the turning state has come to be out of such a range that a rolling motion of a vehicle body can be actively controlled. With respect to the claimed recitation "wherein the inverse of the product of a normal efficiency and a reverse efficiency of said speed reducing mechanism is equal to or greater than 1.17 and equal to or smaller than 3.75", as best understood by the examiner, Buma et al discloses the efficiency of the speed reduction mechanism (see column 6, lines 12-25)

# Allowable Subject Matter

- 7. Claims 2-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 8. Claims 4-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3616

### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan C. To whose telephone number is (571) 272-6677. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (571) 272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
